Nathan S. Santos

R. Laurindo Januário da Silveira, 3095, apt. 6, Lagoa da Conceição, Florianópolis, Santa Catarina, Brazil

T: +55 48 99649-0001
E: nathansilvasantos@gmail.com

Summary

Front-end engineer with 4 years of experience specializing in building high-quality digital products. Passionate about learning, applying new technologies, and constantly improving my skills. As a developer, I aim to write clean code which can be easily read, tested, maintained, reused and extended. I am highly committed to my work, always doing my best to push initiatives to successful completion.

Diversified skills include leading a development team and client relations. Please refer to the recommendations at my LinkedIn profile for additional details.

  - Mongoose (basic)

Personal Open Source Projects

[Evolution Graph](#)
Highly customizable, animated, responsive, and dependency-free Evolution Graph implementation. The package is built with Vanilla JavaScript and is used to create flexible data visualizations and present evolution relationships between entities.

[Clockify Teams](#)
Team management app used to generate warnings and send reports about collaborator's performance and payments.

[React Vite Boilerplate](#)
Boilerplate for React.js applications, built with Mobx as a state manager, Material UI as a component library, and Vite as a front-end build tool.

[React Native Boilerplate](#)
Boilerplate for React Native applications, built with Mobx as a state manager and Native Base as a component library.

Recommendations

"Nathan has been a key part of the team since joining W16, eager to learn new skills and always seeking a pixel perfect execution in the projects he works on, quickly becoming a development leader in one of our teams. He also spearheaded numerous innovations within the company, whether in tools or methods. An absolute excellent professional and person."

Marco Baumann - *Co-Founder at [W16 Software House](#).*

"I've been working with Nathan for the past four years and I'm certain that he's a great professional. He started working as a professional developer with us and, on each project, he proved having the skills to reach even higher than he first thought. Technically, he has what is needed to create beautiful and functional frontend applications, as well backend and API integrations, and mastering new technologies. He's a very communicative person, which helped succeed on many projects with us, along with big commitment with project deadlines and to the work environment."

Victor Alves - *Co-Founder and Business Manager at [W16 Software House](#).*
